Sustainability at WEFTEC

Dashboard

WEF is aware that large live events have significant environmental impacts and is committed to minimizing WEFTEC's impacts both globally and locally. We are taking steps to better measure our climate footprint; taking actions to reduce greenhouse gas emissions as much as possible; and compensating for emissions that are unavoidable.

Attendees and exhibitors are invited to join our conservation effort by offsetting the greenhouse gas emissions generated by their travel to and from New Orleans. Opt-in and select your contribution amount during the conference registration process. Your contributions will be applied to purchasing Certified Emissions Reductions (CERs) from the United Nations' (UN's) carbon offset platform: <http://offset.climatepartnering.org>. The CERs are generated from Clean Development Mechanism (CDM) projects. These projects, which are in developing countries to offset unavoidable emissions or as a contribution to the global climate action. Carbon offset icons on conference badges will acknowledge contributors.

To further WEF's commitment to carbon neutrality, we will match your contributions up to \$10,000.
