PREPARING AND SUBMITTING YOUR WEFTEC PAPER

SCHOLARSHIP

WEF requires authors to practice good scholarship in the preparation of technical papers. Authors who are reliant on the concepts of other earlier investigators must provide references to that work. This is also in reference to the use of data, information, and reproduced figures or tables. This requirement is not only for the ethical practice of giving credit where it is due but also to allow any reader to research earlier developments.

Please have your paper edited and proofed before submittal. It will be published as is in the online proceedings, and in other publications if accepted. WEF has aligned formats for WEFTEC and our scholarly journals to make it easier for you.

CONFERENCE PROCEEDINGS

For the proceedings to be delivered to all conference attendees within a timely fashion, it is important for all abstract authors to submit their technical papers no later than the submittal deadline.

All papers must be submitted via the speaker portal by 9AM Eastern on July 12th. Late papers will not be included in the conference proceedings.

General Guidelines

- Technical papers <u>must</u> be submitted in PDF format. (Accept all track changes before converting to PDF.)
- Minimum of 4 pages, Maximum of 30
- WEF Staff will provide a template for your technical paper.
- Do not include page numbers.
- Do **not** include your own header and footer.
- Must submit via the speaker portal. Any documents emailed to WEF Staff will not be accepted.
- When submitting final paper, save file name as "Author Last Name – Abstract Number – Paper". (Ex: Goines – 1234 – Paper)

Author Reminders

- Author list on submitted technical paper <u>must</u> match author list provided in the speaker portal.
- All authors and co-authors must sign the license agreement provided in the speaker portal by August 1st.

Creating Your Technical Paper

The following pages contain instructions and tips on how to create and format your technical paper. The guidelines are a tool providing information of what to include in each section of your paper. Please use this document alongside the template provided to ensure your paper meets the necessary requirements.

Papers not meeting WEFTEC conference proceeding guidelines will not be included in the conference proceedings for WEFTEC 2023.

In your technical paper, be sure to use cross referencing, include hyperlinks, and accept all track changes before converting to PDF format and submitting.

If at any time you need assistance or have questions, please reach out to WEF Staff at speakers@wef.org.

PAPER SUBMISSION

Once you have finished your paper, be sure to go over the guidelines one last time to make sure your paper's formatting is correct. Only papers following the WEFTEC guidelines can be accepted into the program. Before submission you need to make sure you have accepted all track changes and exported the paper in PDF format.

Paper submission will be available in the speaker portal beginning on June 1st, 2023. All authors will receive an email from the speaker portal system when we are ready to begin collecting papers.

Only primary authors will have the ability to submit papers within the speaker portal. Co-authors will only be able to sign their license agreement.

Technical Paper Summary

For promotion of your paper within the conference proceedings, we ask all WEFTEC authors to submit a **100-word summary** along with your paper.

Use the instructions below to submit your summary via the speaker portal:

- 1. Within the Speaker Portal Dashboard, click on **Edit Speaker** found in the Speaker Center column.
- 2. Find the box with your presentation/paper title. Click the **Edit** button found on the right side of the box
- 3. Type your 100-word summary into the **Technical Paper Summary** box
- 4. Click Save

Final papers <u>and 100-word summaries</u> must be submitted to WEF via the speaker portal by 9:00 AM Eastern on July 12th or we will not be able to include your presentation in the program.

If you have any questions regarding the final paper or the license agreements, please send an email to WEF Staff at speakers@wef.org.

FORMATTING

Paper Size/ Orientation	8.5" x 11"
	Portrait
Length	4-page minimum
	30-page maximum
Line and Paragraph Spacing	Single space within paragraphs, double space between paragraphs
	Do not include indents
Margins	1-inch margins all around
Justification	Left Aligned
Fac.4	Times New Roman
Font	12-point
	Superscripts and subscripts should be no smaller than 6-point font Do <u>not</u> insert your own headers, footers, or page numbers.
Headers and Footers	Provided technical paper template will include the required header and footer. Do
rieaucis allu Foolels	not submit paper without the header and footer provided on the template.
Company Logos	Do <u>not</u> include company or organization logos, including WEF/WEFTEC logos.
Notes	Do <u>not</u> include footnotes. Endnotes preceding references are acceptable.
	Must be embedded.
Graphics	 Do <u>not</u> include graphics in the Abstract section.
	Figure headings should be located under the figure.
	Table headings should be located above the table.
	Do not use photographs of people.
	Must fit within paper size.
	Equations should remain in the body of the text.
	Format as a separate paragraph.
Equations	 Equations and formulas should be numbered separately and
4	sequentially throughout the text.
	 All variables and special symbols, such as Greek letters, must be clearly
	identified and explained, with units of measurement provided.
	Supply all data in the text, figures, and table in metric notation and
Units of Expression	International System of Units (SI) nomenclature.
·	If desired, show English/conventional units in parentheses following the matrix quantities
	metric quantities.
In-text Citations	Scholarship
	WEF requires authors to practice good scholarship in the preparation of technical
	papers. Authors reliant on the concepts of earlier investigators must provide
	<u>references to that work</u> . This also extends to the use of data, information and reproduced figures or tables. This requirement is not only for the ethical practice
	of giving credit where credit is due but to allow any readers to research earlier
	developments.
	Cited references in the narrative, graphics and tables should consist of
	either the author(s) and year of publication or the year of the publication
	only, depending on the narrative context.
	 If the same author(s) is cited in more than one publication in the same
	year, lowercase letters (a, b, c, etc.) are appended to the year in the first
	and succeeding citations.
	Periodical titles are to be abbreviated in accordance with the CAplus
	system (<u>http://www.cas.org/sent.html</u>).

STYLE ELEMENTS

Capitalization	Capitalize words that are 4 characters or more, including prepositions
	To (capitalize when part of an infinitive)
	Example: Production Department To Develop New Logo
	to (lowercase when part of a preposition)
	Example: Driving Production to the Brink of Insanity
	as (lowercase when used as a preposition)
	mgd (all lowercase)
Punctuation	Use a serial comma when writing lists. (The flag is red, white, and blue.)
	Spacing Only one space after any punctuation mark (period, comma, colon, etc.)
	Bulleted List Introduce list with a colon: And capitalize the first letter after the
	colon in a sentence.
Hyphenation and Commonly	Cost-effective
Used Words	Fixed-film
	Graywater
	 High (most compound adjectives formed with "high" are hyphenated:
	high-rate, high-velocity, high-speed)
	Hollow-fiber (adjective)
	In situ (not italic)
	 Jump-start (always hyphenate)
	 Leading-edge (adjective)
	Low-dose (adjective)
	 Long-term (adjective), long-term (noun)
	Online (except on-line process analyzer)
	Onsite
	Pretreatment
	Real-life (adjective)
	Real-world (adjective)
	Re-rate, re-rating
	Reuse
	Side stream
	Small-scale
	 Stormwater
	System-wide
	Triple-bottom-line (adjective)
	State names should be spelled out. (Example Virginia and not VA)
Acronyms and Terminology	 Use common acronyms to abbreviate long expressions.
Actoriying and Terminology	
	Spell out acronyms on the first occurrence. The spell out acronyms on the first occurrence.
	To promote public acceptance of reuse projects, the Water Environment
	Federation has adopted the use of the word biosolids to describe the
	primarily organic solids product of municipal wastewater treatment that
	meets U.S. Environmental Protection Agency or applicable criteria for
	beneficial use. Biosolids is generally used after recycling criteria have
	been achieved, typically at the outlet of the stabilization process. Sludge
	refers to the unstabilized solids and should be used with a specific
	process descriptor, such as primary sludge, waste activated sludge, or
	secondary sludge. For a general description, solids or residuals is
	preferred. In addition, sludge is discouraged as a process descriptor. For
	example, use <i>dewatering</i> and not <i>sludge dewatering</i> .

CONTENT DETAILS

	T
Title	Bold
	16-point font
	Left aligned
	Do not use colons, question marks, or other unnecessary punctuation
	Limit to 135 characters
	 Do not include conference name, location, or date.
	Do not include session title.
Author Affiliation	List all authors (full name) and their affiliations using numerical superscripts.
	Identify the corresponding author by an asterisk. Provide email address for
	corresponding author.
Headings and	Headings (Example: ABSTRACT)
Subheadings	Flush left
	Boldface
	• 12-point font
	All Caps
	Subheadings (Example: Subhead Title)
	Flush left
	Boldface
	• 12-point font
	Upper and Lower Case
Abstract	Concise, factual summary of the paper including objectives, methods, results, and
Marriagala (, , , ,)	conclusion. Limited to 150 words.
Keywords (required)	Listed in order of importance, Separated by a comma
	Identify the main points of paper
Later Landau	Limited to 10 keywords/phrases
Introduction	Introduce your topic and outline the problems here. Place your work in the context
Mathadalagy	of other work done in the field, referencing pertinent research and background.
Methodology	Include all information necessary for replication of the work. Include a surger of metarials as we simply and detail descriptions.
	Include source of materials, experimental conditions, and detail descriptions of any new techniques.
	of any new techniques.
	 Include the vendor/supplier and its location (city, state/province, country) for all products and equipment.
	 Identify computer software by name and location of the developer and version number.
Results	Highlight key outcomes and attribute and acknowledge all data properly.
Discussion	Place results in the proper context, being sure to cover points mentioned in your
Discussion	introduction. Elaborate upon any important and/or unexpected outcomes.
Conclusion	Tie up your key points and discuss possibilities for further research or work.
References	Included at end of the paper
10.0.0.0.0	Alphabetize list by last name of the first cited author
	 Order items in each reference as: author(s); year of publication; title of
	work; periodical, publisher, conference, etc.; volume number, issue number
	(if journal does not use continuous pagination), and initial and final page
	numbers
	 Begin each reference on the left margin and indent subsequent lines by ½
	inch.

ASSIGNING STYLES

To make things easy for those that are unfamiliar with the use of Styles the template includes a style format table from which one can copy the format by following these steps.

On the View Ribbon use the Split button the split the screen

Position the format table at the bottom screen

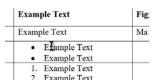

Place the curse within the example text for the style format you wish to copy.

Click on the format painter on the Home Ribbon to copy the format. This will copy the format of the text/paragraph at the location of the curser.

Double click to assign he format to multiple location (i.e. multiple headings throughout the paper)

Activate the top screen by clicking on it once. After the first click the paint format symbol will appear next to the curser

Now use the mouse to apply the format to the intent text segment by "painting" the format onto the text segment. The formatted segment will appear selected.

CROSS REFERENCING

Cross referencing numbered items in Word allows automatic generation of things like a table of content of list of figures, though neither is needed in a paper. Cross referencing figure and table cation however does one more thing. It creates a hyperlink between the caption reference and the caption. Therefore, allowing a reader of the electronic paper to jump straight to the figure or table that is referenced in the text and then used the return button to navigate back to the location of the cross reference. This capability is retained when the document is converted to a pdf.

To cross reference a caption, follow these steps:

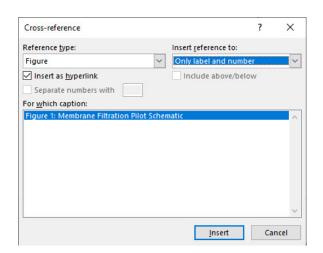

On the reference Ribbon select Crossreference

In the Cross Reference dialog Box select the Reference Type (i.e. Table or Figure)

Select "Only label and number" under "Insert reference to".

Finally select the caption to reference and click on insert

One the cross reference has been inserted it can be used to navigate directly to the referenced object by holding the Ctrl key and clicking on the cross-reference. This capability is retained when generating the pdf.

GENERATE THE PDF

There are many options to generate a pdf from a word document through Adobe, Bluebeam or other pdf software. This instruction document only covered the MS Word native pdf export function. Note that other software may have options to include or exclude the cross-referencing links. Follow these steps to export the finished paper as a pdf.

Select the File tab and chose Export

Select pdf and click on create

Verify the caption links work in the pdf. When pacing the curser over the caption reference a hand should appear.
